

## Closure planning, decommissioning, demolition & rehabilitation

Closure planning is an essential part of the business life-cycle, and an expectation of sound financial and operational governance.

Eyre Advisory Services (EAS) was established by the former Flinders Power executive team following the successful closure, decommissioning, demolition and rehabilitation of the coal-fired 800MW Northern and Playford Power Stations and Leigh Creek Coal Mine, and the managed transition of the Leigh Creek Township and Railway.

We've been there and done it - one of few organisations to lead the planning, delivery, rehabilitation and relinquishment of major Australian mining leases and coal-fired power station assets. Our experience base enables our clients to learn lessons from the front-line.

We work closely with community, political, regulatory and key stakeholder groups to ensure their interests and expectations are coordinated in a strategic way to build trust and minimise project and reputational risk. We have a strong and experienced network of specialists.

Talk to us about how our experience base can deliver real benefits to your business.

### **We can assist you with:**

- Closure/Rehabilitation Plan development and implementation
- PEPR / Mine Operating / Management Plan development
- Closure cost modelling
- Stakeholder management
- Regulatory engagement
- Independent review
- Infrastructure demolition
- Land end-use
- Risk management

### **Our client sectors include:**

- Operational mines and quarries
- Care and maintenance mines
- Power generation facilities
- Construction and demolition
- Industrial processing
- Logistics infrastructure and operations
- Consultants
- Regulatory bodies
- Governments
- Utilities

## Our Industrial Closure Team

Our team has decades of combined experience in developing, implementing, monitoring and continuously improving culture, strategy and risk management performance at all levels of the organisation - from the board room to the crib room. We have been leaders of major operational power station, mines and industrial facilities. We serve on a variety of not-for-profit and industry-member boards. We are grounded and passionate.

### Peter Georgaris

Partner

With more than 30 years of experience as a senior manager in the energy and railway industry, Peter has extensive knowledge of strategic planning, operational management, stakeholder management and compliance. As the former CEO of Flinders Power, Peter understands the value of strong and genuine relationships.
