

Health, Safety and Environment

At EAS, a vision of Zero Harm is core to our DNA.

Compliance is just the beginning. Our philosophy is that leadership builds a safety-first culture, and a safety-first culture saves lives. We have more than 20 years of experience in implementing best-in-class safety leadership programs, supported by foundation management systems and processes that are efficient and effective.

We take pride in our ability to diagnose barriers to the achievement of a zero harm vision, and to prepare and implement strategies that improve performance.

Our philosophy for environmental management is centred on a plan-do-measure-communicate-improve cycle. We see environmental management and the development of practical sustainability programs as not simply compliance obligations, but as opportunities for point-of-difference business success.

Talk to us about how our experience base can deliver real benefits to your business.

We can assist you with:

- Compliance audits and programs
- Management system development

Our client sectors include:

- Construction and demolition
- Power generation
- Mines and quarries
- Industrial processing
- Rail infrastructure and operations
- Consultancies
- Regulatory bodies
- Governments
- Utilities
- Not-for-profit

Our HSE Team

Our team has decades of combined experience in operational health, safety and environmental management in high-risk industries including mining, power generation, industrial processing, railway operations and manufacturing. We work at all levels of the organisation - from the board room to the crib room. We have been responsible for HSE performance on major projects. We have been front-line leaders of major operational power stations, mines and industrial facilities.

We have experienced when it goes wrong and have led workforce recoveries. We are grounded and passionate.

Brad Williams
Partner

With more than 20 years of experience in power generation, mining, utilities and heavy industry, Brad has proven experience as Project Director and as a senior health, safety, security, environment and community professional. His management style is underpinned by his philosophy of strong leadership and culture and its importance to organisational success.
